Description

The high-quality industrial Panel PCs and monitors of product line „Taurus“ are absolutely rugged and durable. The polished V2A / V4A stainless steel housing with protection class IP65 or IP67 is completely sealed. Because of the smooth surfaces - especially the True Flat Front - are the products of the "Taurus" line easy to clean and suitable for use in areas with high hygiene requirements.

A compact and rugged construction and the existing level of IP rate protects the PC against dirt, dust, humid environment and other extreme applications.

The hardware is constantly state of the art and provides enough space for future designs and applications. Individual product adaptations/solutions can be realised in accordance with customer requirements.
