

# Single / Dual / Triple / Quad FCB200

### **Features**

- L-Band IF
- Cost effective solution
- Fully compliant with IESS 308/309
- High linearity
- Low group delay
- Front panel control (local)
- Full remote control (remote)

### **Overview**

The Advantech HP range of converters uses the latest technology in conversion, local and remote control thus providing the ultimate in performance and user friendly operation at a very competitive price.

The spectral purity, low phase noise and stability exceed the requirements of all major international satellite network operators.

The flexible and comprehensive monitor and control features on the HP converter ensure that it will fit into any network management system architecture. The user-friendly front panel or the RS485 remote interface will provide full set-up and fault monitoring facilities. The RS232 will provide the Monitor and Control functions via a PC and will also allow for software upgrades downloading.

The PLL oscillator used in the converter is either locked to a highly stable internal 10 MHz reference or if the external reference option is fitted and the proper level of signal is present, the PLL will automatically lock to the external reference.

# **Application**

The HP range of converters is particularly suited for use in VSAT, SCPC Networks, SNG, DVB-RCS and Hub systems. This makes them an ideal choice for large earth stations requiring cost effective solutions for frequency conversion. The lightweight, rugged and compact design also ensures that the HP converter provides the ideal solution for mobile truck or flyaway DSNG systems. With a fully welded aluminum chassis and robust modular internal construction the converter can even meet the demands of military installations.

The HP range of converters provides an industry leading MTBF of over 120,000 hours.

# Operating Bands Up-Converters

<u> </u>			
Model Number	Туре	Input Frequency	Output Frequency
ARUN-LX	single		
ARUD-LX	dual	950-1450 MHz	7.9 - 8.4 GHz
ARUT-LX	triple	950-1450 IVIDZ	Non-inverted
ARUQ-LX	quad		

### **Down-Converters**

Model Number	Туре	Input Frequency	Output Frequency
ARDN-XL	single		
ARDD-XL	dual	7.25 - 7.75 GHz	950 – 1450 MHz
ARDT-XL	triple	7.25 - 7.75 GHZ	Non-inverted
ARDQ-XL	quad		

### **Up/Down -Converters**

Model Number	Туре	Input Frequency	Output Frequency
A5471V	Up section	950-1450 MHz	7.9 - 8.4 GHz Non-inverted
ARMT-LX	Down section	7.25 - 7.75 GHz	950 – 1450 MHz Non-inverted

## **Options**

- Ethernet port and SNMP Interface
- External 10 MHz with Autosensing
- Dual, quad, Up/Down, or 1:1 redundant hot swap converters in single 1RU chassis
- Redundant Ready (for 1:N)\*

Note: Consult factory for detailed configuration

# X-Band Block Frequency Converters

Jp-Converter		Down-Converter	
F Input		RF Input	
Frequency range	(See table on front page)	Frequency range	(See table on front page)
Impedance	50 Ω	Impedance	50 Ω
Input Connector	BNC (female)	Input Connector	Type N (female)
